BOLTON FOOD ROADMAP

(towards the elimination of both "None of the above categories" in accordance with ISSF Conservation Measures)

BOLTON FOOD is fully committed to progressively reduce the percentages of purchases classified as "None of the above" in both classification in accordance with ISSF Conservation Measures, with the Bolton Food Tuna Sourcing Policy and with the Goal 1 of the [WWF & BOLTON FOOD Partnership](#).

The following milestones are to be achieved:

- By the end of 2024 Bolton Food must confirm that 100% of the tuna supplied to us will come from ISSF Participating Companies by directly eliminating the current residue in the "None of the above" category for Supplier Source Categories".
- The WWF & BOLTON FOOD partnership aims to enhance Bolton Food's sustainable sourcing, aiming to procure 100% of its tuna from MSC-certified fisheries or Credible & Comprehensive Fishery Improvement Projects (FIPs) by the end of 2024. The company pledges to decrease sourcing from stocks with an estimated biomass below the safe biological limits (SSB/SSB0<20%), classified as "overfished" or undergoing overfishing according to official RFMOs stock assessments.
- At the end of 2024, the results achieved will be evaluated and annual targets and possible final deadlines for the achievement of eliminating supply of categories covered by "None of the above" will be reformulated if necessary within the framework of the ISSF's five-year strategic objective and during the term that this Strategic Plan is in force (2023-2027).
