

Among the objectives of the partnership between WWF and Bolton Food, the progressive increase in the transparency of Bolton’s tuna sourcing is one of the main and most relevant. In fact, complete traceability and high levels of transparency in the tuna supply chain are of critical importance to fight against IUU fishing and to reduce fraud, the risk of human rights abuses and environmental degradation linked to fishing activities.

Greater transparency contributes to the positive transformation of the entire industry towards ocean stewardship and to meeting international standards, national laws and the ever-increasing demand by consumers for reliable and transparent information about the origin of their products.

For all these reasons, Bolton Food takes another step towards full transparency in its tuna supply chain by providing the complete list of vessels from which the company has received tuna in the year 2022.
